

QUICK START GUIDE The new Main Menu

There's now a better way to navigate your library catalog! With the launch of our new catalog, every jurisdiction will display their own look and feel of their catalog. The new catalogs have improved the menu options at the top of each page for a more user-friendly approach. All catalogs will have similar menu items at the top of the page with slight differences.

The menu options should look very similar to the old menu, and clicking on each button will send you to the same location as before. However, each menu item has a “drop-down” sub-menu that will allow you to navigate to more of the site with a single click. Here’s a quick look at “My Library” menu.

“My Library” menu contains quick links to the new account management features provided by the new catalog interface: view your holds, fines, lists and shelves here.
